

TIMING UNIT

B. 140

Designed to provide time intervals of from $1/10$ sec. to 1 min., for energising the time signal on Kymographs, and for all purposes where an electrical impulse is necessary to operate Hammers, Keys, etc.

It is also most suitable for use in conjunction with apparatus where definite time cycles are required, such as the Gaddum Outflow Recorder, in which the contact has to be made and broken at definite intervals.

The unit consists of a small governed electric motor, driving through a six ratio change speed gear box, a large 8 segment commutator; 3 segments being arranged for normal time intervals and the 5 remaining segments used to give make and break contacts of various duration.

Fitted in a hard wood case with removable glass panel; can be supplied for A.C. or D.C. electric supply.

PRICE B. 140 £12. 10. 0
