

PROCEEDINGS OF THE PHYSIOLOGICAL SOCIETY

Contents

Newcastle upon Tyne Meeting
9–10 November 1994

Communications

Epithelia & Membrane Transport *2P*

Symposium Proceedings

- Yun, C.H., Tse, C.-M., Nath, S., Levine, S.L. & Donowitz, M. *1S*
Structure/function studies of mammalian Na–H exchangers
– an update
- Hediger, M.A., Kanai, Y., You, G. & Nussberger, S. *7S*
Mammalian ion-coupled solute transporters
- Jentsch, T.J., Günther, W., Pusch, M. & Schwappach, B. *19S*
Properties of voltage-gated chloride channels of the ClC gene family
- Cunningham, S.A., Frizzell, R.A. & Morris, A.P. *27S*
Vesicular targeting and the control of ion secretion in epithelial
cells: implications for cystic fibrosis
- Higgins, C.F. *31S*
Volume-activated chloride currents associated with the multidrug
resistance P-glycoprotein

PROCEEDINGS OF THE PHYSIOLOGICAL SOCIETY

JANUARY 1995 Volume 482.P
